

1. Record Nr.	UNINA9910459255003321
Autore	Weimer David Leo
Titolo	Medical governance [[electronic resource]] : values, expertise, and interests in organ transplantation // David L. Weimer
Pubbl/distr/stampa	Washington, D.C., : Georgetown University Press, c2010
ISBN	1-58901-682-3
Descrizione fisica	1 online resource (231 p.)
Collana	American governance and public policy series
Disciplina	617.9/54
Soggetti	Procurement of organs, tissues, etc - United States Transplantation of organs, tissues, etc - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Medical governance : important but neglected -- Balancing values, expertise, and interests -- The organ procurement and transplantation network -- Expanding organ supply -- Liver allocation and the final rule -- Incremental response to racial disparity in kidney allocation -- The kidney allocation review : can the OPTN make nonincremental change? -- How and how well does the OPTN govern? -- Is the OPTN a viable and desirable model in other medical contexts?
Sommario/riassunto	Governments throughout the industrialized world make decisions that fundamentally affect the quality and accessibility of medical care. In the United States, despite the absence of universal health insurance, these decisions have great influence on the practice of medicine. In Medical Governance, David Weimer explores an alternative regulatory approach to medical care based on the delegation of decisions about the allocation of scarce medical resources to private nonprofit organizations. He investigates the specific development of rules for the U.S. organ transplant system and details the conv
