Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Includes bibliographical references and index. Nota di bibliografia Nota di contenuto section 1. Cognitive neuroscience approaches to generalization -section 2. Developmental perspectives on generalization -- section 3. Representations that support generalization -- section 4. Educational and training approaches to generalization -- section 5. Technological approaches to generalization. Sommario/riassunto While the notion of generalization fits prominently into cognitive theories of learning, there is surprisingly little research literature that takes an overview of the issue from a broad multifaceted perspective. This volume remedies this by taking a multidisciplinary perspective on generalization of knowledge from several fields associated with Cognitive Science, including Cognitive Neuroscience, Computer Science, Education, Linguistics, Developmental Science, and Speech, Language and Hearing Sciences. Researchers from each perspective explain how their field defines generali
