Sommario/riassunto	What is the role of the individual school 'subject' and 'subject teacher' within school? Is it to teach a set of core subject knowledge, skills and understanding in way that remains faithful to long-standing subject cultures and pedagogies? Or is there another way to consider how the

curriculum, and the notion of individual subjects and teachers' pedagogy, could be constructed. Working from the key principle that there is no curriculum development without teacher development, *Cross-Curricular Teaching and Learning in the Secondary School* argues for a new, skilful pedagogy.
