   Soggetti   Medical informatics - Social aspects
                       Health services administration - Data processing
                       Health services administration - Information technology
                       Electronic books.

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references and indexes.

   Nota di contenuto   pt. A. Keynote presentations -- pt. B. General considerations -- pt. C. Design -- pt. D. Implementation -- pt. E. Patient -- pt. F. Safety.

   Sommario/riassunto Ten years ago, two landmark reports were published by the Institute of Medicine on human error in medicine and the quality chasm. It seems appropriate then, that the fourth international conference Information Technology in Health Care, should re-visit these themes now to examine how safer systems can be designed and implemented to improve patient safety. This book presents the proceedings of that conference. Many policies and programs have been initiated internationally to stimulate the use of electronic health care and record systems. Unfortunately, these do not always run smoothly. For exam
