Sommario/riassunto	Systematic efforts in the subject of Biotechnology` started in India in 1986 with the formation of the Government-run `Department of Biotechnology`. Since then the subject has grown fast and progress can be seen by the large number of universities, institutes, and industries conducting teaching, research and applications in the areas of biotechnology. Initially the bbok `Advances in Biotechnology` was designed to satisfy the needs of undergraduate students and also to

popularise this multi-disciplinary subject with all those enthusiastic people who would like to get the feel of the subject. I
