

1. Record Nr.	UNINA9910459323403321
Titolo	Chrono-topologies [[electronic resource] ] : hybrid spatialities and multiple temporalities // edited and introduced by Leslie Kavanaugh
Pubbl/distr/stampa	Amsterdam, : Rodopi, 2010
ISBN	1-282-89946-5 9786612899461 90-420-3142-5
Descrizione fisica	1 online resource (240 p.)
Collana	Critical studies ; ; v. 32
Altri autori (Persone)	KavanaughLeslie
Disciplina	003.
Soggetti	Social sciences Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preliminary material / Editors Critical Studies -- Table of Contents / Editors Critical Studies -- Introduction / Leslie Kavanaugh -- Minkowski's Space-Time: From Visual Thinking to the Absolute World / Peter Galison -- Materialist Theories of Time / Richard T.W. Arthur -- Corollaries on Space and Time: A Survey of Arabic Sources in Science and Philosophy / Nader El-Bizri -- Agency and Space in Darwin's Concept of Variation / Chunglin Kwa -- The Time of History/The History of Time / Leslie Kavanaugh -- Places Lived in Time / Mary Lynne Ellis -- Intermittences: Merleau-Ponty and Proust on Time and Grief / Patricia Locke -- Lyrical Bodies: Music and the Extension of the Soul / Sander van Maas -- Phased Space / Raviv Ganchrow -- The Evidence of Film and the Presence of the World: Jean-Luc Nancy's Cinematic Ontology / Josef Früchtl -- Societies of Control and Chrono-Topologies / M. Christine Boyer -- Digital Architecture and the Temporal Structure of the Internet Experience / Antoine Picon -- List of Contributors / Editors Critical Studies.
Sommario/riassunto	The twentieth century saw many revolutions. Various transformations in the political, economic, social, technological and artistic domains not only inaugurated new eras, or at least discourses about new eras; they also often entailed a radical reorientation in the very conceptions by

which any revolution could be thought. This beautifully edited collection of essays addresses itself to the particular revolution by which we came to understand the unity of space and time as ontological categories. The twelve papers collected in this volume explore the consequences of conceptions of time and its relationship to space. Although originating from the revolution in mathematics and theoretical physics, these essays extend the thinking of space-time in a multi-disciplinary approach through the philosophy of space and time, social geography, post-Marxian social theory, new network theory, the philosophy of art and culture, musicology, evolutionary biology, historiography, psychoanalytic theory, and comparative literature. The result is a fascinating snapshot of a nearly universal transformation, but one that was only slowly realized, as the debates in one field reverberated across a vast terrain of discourse and discipline. In tracing the varied responses to the developments emanating from theoretical physics, the essays in this volume reveal how discontinuous but profound shifts in knowledge and aesthetics ultimately converge on a radically transformed horizon. Contributors are: Peter Galison, Richard T. W. Arthur, Nader El-Bizri, Chunglin Kwa, Leslie Kavanaugh, Mary Lynne Ellis, Patricia Locke, Sander van Maas, Raviv Ganchrow, Josef Früchtl, M. Christine Boyer, and Antoine Picon.
