Nota di contenuto	Thermodynamics: the language chosen defines the debate -- The tragedy of the commons: a class of problems that has no technical solution -- The willful ignorance of realpolitik: market failure or cost-shifting success? -- The general theory of second best: a rigorous justification for an intuitively just proposal -- Through the bottleneck of a cowboy economy: financing shovel-ready projects -- Conclusions: reason for hope and despair.
Sommario/riassunto	Climate change lends itself to both political economy and humor. Through the lens of thermodynamics, the payment Ecuador seeks for not drilling in the Yasuni is equitable and efficient.
