All development stakeholders have important roles to play; Conclusion; References
Sommario/riassunto	People with mental health conditions have been excluded from the development agenda despite being a marginalized and vulnerable group in countries all over the world. This report highlights the urgent need to redress this situation. It presents compelling evidence that people with mental health conditions meet major criteria for vulnerability and yet fall through the cracks of development aid and government attention. It makes the case for reaching out to this vulnerable group through the design and implementation of appropriate policies and programs and through the inclusion of mental health
