Sommario/riassunto	Considering the role of women as educational policy-makers, and in particular focusing on 29 women members of the London School Board, this book examines the link between private lives and public practice in Victorian and Edwardian England. These political activists were among the first women in England to be elected to positions of political responsibility. Key concerns in the book are issues such as gender and power, and gender and welfare.

2. Record Nr.	UNINA9910138959303321
Autore	Klein Harvey G
Titolo	Mollison's blood transfusion in clinical medicine / / Harvey G. Klein, David J. Anstee

Sommario/riassunto	"Mollison's Blood Transfusion in Clinical Medicine is an icon in the field of transfusion and the first edition was published in 1951. The book arose from the concept of the transfusionist, as both scientist and expert consultant. For many years, this text has provided the primary, and often the sole, reference for detailed information and practical

experience in blood transfusion. The book is completely revised and updated throughout to include the latest advances and developments in the field"--Provided by publisher.
