

1. Record Nr.	UNINA9910459414103321
Titolo	Translating chronic illness research into practice [[electronic resource] /] / edited by Debbie Kralik, Barbara Paterson, Vivien Coates
Pubbl/distr/stampa	Chichester, West Sussex ; ; Ames, IA, : Wiley-Blackwell, 2010
ISBN	1-282-69093-0 9786612690938 1-4443-1869-1
Descrizione fisica	1 online resource (225 p.)
Altri autori (Persone)	KralikDebbie PatersonBarbara L CoatesVivien E <1957-> (Vivien Elizabeth)
Disciplina	362.196 616.044
Soggetti	Chronic diseases Chronic diseases - Research Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Translating Chronic Illness Research into Practice; Contents; List of Contributors; Preface; 1. Globalisation of Chronic Illness Research; Introduction; What is in a name?; Global crisis in chronic illness; Impact of chronic illness in developing nations; Trends in chronic illness research in developed nations; Policy drivers: taking action; Global initiatives for future chronic illness management; Conclusion; References; 2. Transitional Processes and Chronic Illness; Introduction; The search; Defining transition; An emerging understanding of transition; Describing transition Transition and identityTransition and transformative learning; Transitional processes; A transition framework for practice; Conclusion; References; 3. Translating Chronic Illness Research Across the Lifespan; Introduction; Human development across the lifespan; Key assumptions of the lifespan developmental perspective; Human development in old age; Applications of lifespan developmental perspectives in chronic illness research; Supporting age-appropriate development without

jeopardising the safe management of serious chronic disease: the case of cystic fibrosis
Chronic illness in old age: providing developmentally appropriate integrity-promoting care to persons suffering from dementia
Conclusions and implications; References; 4. Assisting People with Chronic Illness to Manage Co-Morbid Conditions; Introduction; Conceptualising co-morbidity; Social determinants of co-morbidities; The medical paradigm; Health-care systems; Co-morbidity management; Models of chronic illness management; Conclusion; References; 5. Conceptualisation of Self-Management; Introduction; Background to the use of the term self-management
Historical developments in self-management
Associated concepts or models that overlap with or inform self-management; Alternative definitions of self-management; Conclusions: the future for chronic condition self-management; References; 6. The Relevance of Self-Management Programmes for People with Chronic Disease at Risk for Disease-Related Complications; Introduction; Background; Theoretical framework; Overview of relevant research; Sample; Participation; Attrition; Discussion; Conclusion; References; 7. The Potential of Technology for Providing Social Support to People and Families
Introduction
Background; The Internet as a health resource; Impact of advanced technology in fostering therapeutic gain: overview of relevant research; Social support delivery: considerations in selecting advanced technology methods; Into the virtual future. . .; References; 8. Chronic Illness Research: Translating What We Know into What We Do; Introduction; The task ahead; The dose-response problem; The promise of research; Knowledge translation: emerging from navete; Embedding KT within research agencies and grants; Web-based KT innovations; What chronic illness research gets taken up? Policy containers and the future of chronic illness

Sommario/riassunto

Translating Chronic Illness Research into Practice presents recent developments in chronic illness research and their implications for clinical practice. It delivers both a synthesis and a critique of current chronic illness research and its applications to chronic illness prevention, treatment and care. It promotes advances in knowledge about chronic illness, including discussion of the future directions for chronic illness research and gaps in present knowledge about effective chronic illness prevention, treatment and care. Key features: Contains contributions from internatio
