| | Titolo | Biblical interpretation in early Christian Gospels . Volume 2 The Gospel of Matthew [[electronic resource] /] / edited by Thomas R. Hatina |
| | Pubbl/distr/stampa | London ; ; New York, : T & T Clark, c2008 |
| | ISBN | 1-282-86864-0 <br> 9786612868641 <br> 0-567-55398-1 |
| | Descrizione fisica | 1 online resource (245 p.) |
| | Collana | Library of New Testament studies ; ; 310 <br> Studies in scripture in early Judaism and Christianity ; ; v. 16 <br> T & T Clark library of biblical studies |
| | Altri autori (Persone) | HatinaThomas R |
| | Disciplina | 225.6 <br> 226.06 |
| | Soggetti | Electronic books. |
| | Lingua di pubblicazione | Inglese |
| | Formato | Materiale a stampa |
| | Livello bibliografico | Monografia |
| | Note generali | Description based upon print version of record. |
| | Nota di bibliografia | Includes bibliographical references and indexes. |
| | Nota di contenuto | Contents; Preface; Abbreviations; Contributors; Introduction; 1. Myth Theory, Comparison and Embedded Scripture Texts: Ibn Ishq's Biography of Muhammad and the Mythologizing Function of Isaiah 7.14 in Matthew 1.23; 2. Love as Societal Vision and Counter-Imperial Practice in Matthew 22.34-40; 3. Matthew's Earliest Interpreter: Justin Martyr on Matthew's Fulfilment Quotations; 4. 'The Book of the Genesis of Jesus Christ': The Purpose of Matthew in Light of the Incipit; 5. Mark, Elijah, the Baptist and Matthew: The Success of the First Intertextual Reading of Mark <br> 6. Reading Zechariah and Matthew's Olivet Discourse7. From History to Myth and Back Again: The Historicizing Function of Scripture in Matthew 2; 8. Plotting Jesus: Characterization, Identity and the Voice of God in Matthew's Gospel; 9. The King as Shepherd: the Role of Deutero-Zechariah in Matthew; 10. Matthew's Atomistic Use of Scripture: Messianic Interpretation of Isaiah 53.4 in Matthew 8.17; 11. Matthew's Intertexts and the Presentation of Jesus as Healer-Messiah; 12. Scribal Methods in Matthew and Mishnah Abot; Bibliography; Index of References; Index of Authors |

| Sommario/riassunto | The second title in a proposed five-volume work; volume two, following on from the volume on Mark's Gospel, concentrates on Matthew's Gospel. Contributors consider the function of embedded scripture texts in the context of the Gospels written and read/heard in their early Christian settings. The project is wide ranging, with essays on the function of scripture in the compositional history of the gospels and the collection is broad in scope as a result of current interest in the integration of methods (especially historical and narrative ones). Advancements over the last 20 years in the study o |

| Sommario/riassunto | Transactions on Petri Nets and Other Models of Concurrency (ToPNoC) II These Transactions publish archival papers in the broad area of Petri nets and other models of concurrency, ranging from theoretical work to tool support and industrial applications. ToPNoC issues are published as LNCS volumes, and hence are widely distributed and indexed. This Journal has its own Editorial Board which selects papers based on a rigorous two-stage refereeing process. ToPNoC contains: - Revised versions of a selection of the best papers from workshops and tutorials at the annual Petri net conferences - Special sections/issues within particular subareas (similar to those published in the Advances in Petri Nets series) - Other papers invited for publication in ToPNoC - Papers submitted directly to ToPNoC by their authors The second volume of ToPNoC focuses on Concurrency in Process-Aware Information Systems. Although the topic of business process management using information technology has been addressed by consultants and software developers in depth, more fundamental approaches towards such Process-Aware Information Systems (PAISs) have been rather uncommon. It wasn't until the 1990s that researchers started to work on the foundations of PAISs. Clearly, concurrency theory is an essential ingredient in these foundations as business processes are highly concurrent involving all types of routing logic and resource allocation mechanisms. The 16 papers in this special issue of ToPNoC cover topics ranging from the formal (mostly Petri-net based) foundations of PAISs to more applied topics such as flexibility and process mining. Thus, this volume gives a good overview of the state of the art in PAIS research. |
