

1. Record Nr.	UNINA9910459440903321
Titolo	Quenching theory and technology // Bozidar Liscic. [and others]
Pubbl/distr/stampa	Boca Raton : , : CRC Press : , : International Federation for Heat Treatment and Surface Engineering, , 2010
ISBN	0-429-12965-3 1-4398-5986-8 1-4200-0916-8
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (728 p.)
Altri autori (Persone)	LiscicB (Bozidar)
Disciplina	671.3/6
Soggetti	Metals - Quenching Precipitation hardening Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Rev. edition of: Theory and technology of quenching. 1993.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover; Contents; Foreword; Preface to the Second Edition; Preface to the First Edition; Contributors; Chapter 1: Hardening of Steels; Chapter 2: Quenching of Aluminum Alloys; Chapter 3: Quenching of Titanium Alloys; Chapter 4: Mechanical Properties of Ferrous and Nonferrous Alloys after Quenching; Chapter 5: Thermo- and Fluid-Dynamic Principles of Heat Transfer during Cooling; Chapter 6: Heat Transfer during Cooling of Heated Metals with Vaporizable Liquids; Chapter 7: Wetting Kinematics; Chapter 8: Wetting Kinetics and Quench Severity of Selected Vegetable Oils for Heat Treatment Chapter 9: Residual Stresses after Quenching Chapter 10: Effect of Workpiece Surface Properties on Cooling Behavior; Chapter 11: Determination of Quenching Power of Various Fluids; Chapter 12: Cooling Media and Their Properties; Chapter 13: Gas Quenching; Chapter 14: Techniques of Quenching; Chapter 15: Intensive Steel Quenching Methods; Chapter 16: Prediction of Hardness Profile in Workpiece Based on Characteristic Cooling Parameters and Material Behavior during Cooling; Chapter 17: Simulation of Quenching; Appendix A: Temperature Conversion Table; Appendix B: Common Conversion Constants

Appendix C: Equivalent Hardness Scale Conversion Table Appendix D:
Water Quenching Data: 7075-T73 Aluminum Bar Probes; Appendix E:
Type 1 Polymer Quenchant Data: 7075-T73 Aluminum Bar Probes;
Appendix F: Type I Polymer Quench Data: 7075-T73 Aluminum Sheet
Probes; Appendix G: Type I Polymer Quench Data: 2024-T851
Aluminum Sheet Probes; Index; Back cover

Sommario/riassunto

Quenching is one of the most fundamentally complex processes in the heat treatment of metals, and it is something on which mechanical properties and distortion of engineering components depend. With chapters written by the most respected international experts in the field, *Quenching Theory and Technology, Second Edition* presents the most authoritative, exhaustive, and recent findings in this vital area. Understanding and control of quenching and quenchant is a critical constant in all well established and emerging heat treatment process technology. The collection of up-to-
