Sommario/riassunto	Martin Hopkinson equips you with the ability to assess the capability of your organisation's risk management process on four distinct levels. This enables you to assess whether your current level of risk management is appropriate for the nature and scale of the projects you are undertaking. Using an objective measure of risk management

capability is extremely valuable for organisations, both the private and public sector need to demonstrate good project governance and to reassure potential project partners of their qualities. Equally the Project Risk Maturity Model provides organisations with
