Sommario/riassunto	This book argues that intellectual property (IP) management

development and innovation are fundamental to economic development , especially in newly emerging economies which often hold vast reserves of natural resources and human knowledge that remain unprotected. It sheds light on countries that are gradually realising this situation, with examples from many parts of the world, including Eastern Europe, Africa and especially Asia including India, where a great deal is being made of innovation and intellectual property to stimulate economic growth. These case studies are seen within the the
