Sommario/riassunto

Prior to and during the Second World War, the Japanese Army established programs of biological warfare throughout China and elsewhere. In these "factories of death," including the now-infamous Unit 731, Japanese doctors and scientists conducted large numbers of vivisections and experiments on human beings, mostly Chinese nationals. However, as a result of complex historical factors including an American cover-up of the atrocities, Japanese denials, and inadequate responses from successive Chinese governments, justice has never been fully served. This volume brings together the contributions of
