Nota di contenuto	pt. 1. General introduction -- pt. 2. The background -- pt. 3. The group-analytic situation -- pt. 4. The conductor's contribution -- pt. 5. Survey.
Sommario/riassunto	Group Analysis, the approach pioneered by Foulkes, is a form of psychotherapy in small groups and also a method of studying groups and the behavior of human individuals in their social aspects. Apart from a number of practical advantages, it has features of specific value. It is a method of choice for the investigation of many problems and for the treatment of many disturbances.
