Lessons from the Case Studies; Index
Sommario/riassunto	The two distinct approaches to environmental policy include direct regulation-sometimes called 'command and control' policies-and

regulation by economic, or market-based incentives. This book is the first to compare the costs and outcomes of these approaches by examining realworld applications. In a unique format, paired case studies from the United States and Europe contrast direct regulation on one side of the Atlantic with an incentivebased policy on the other. For example, Germany?s direct regulation of SO2 emissions is compared with an incentive approach in the U.S. Direct regulation of w

Sommario/riassunto

In this new collection of essays, Adam Michnik-one of Europe's leading dissidents-traces the post-cold-war transformation of Eastern Europe. He writes again in opposition, this time to post-communist elites and European Union bureaucrats. Composed of history, memoir, and political critique, In Search of Lost Meaning shines a spotlight on the changes in Poland and the Eastern Bloc in the post-1989 years. Michnik asks what mistakes were made and what we can learn from climactic events in Poland's past, in its literature, and the histories of Central and Eastern Europe. He calls attention to pivotal moments in which central figures like Lech Walesa and political movements like Solidarity came into being, how these movements attempted to uproot the past, and how subsequent events have ultimately challenged Poland's enduring ethical legacy of morality and liberalism. Reflecting on the most recent efforts to grapple with Poland's Jewish history and residual guilt, this profoundly important book throws light not only on recent events, but also on the thinking of one of their most important protagonists.
