Sommario/riassunto	For several decades, fast-growing East Asia has been the envy of the developing world. Not only has East Asia outperformed all other regions of the world, but it also recovered surprisingly swiftly from the 1997-98 Asian financial crisis and the 2008-09 global financial crisis. Nevertheless, investment in the region remains subdued relative to pre-Asian crisis levels. Are current investment rates too low and, given greater investment, could the region grow even more rapidly? This

book brings together a rich array of papers analyzing the determinants  
of, and impediments to, investment
