

1. Record Nr.	UNINA9910459555203321
Autore	Fang D. G.
Titolo	Antenna theory and microstrip antennas / / D.G. Fang
Pubbl/distr/stampa	Boca Raton, Fla. : , : CRC Press/Taylor & Francis, , 2010
ISBN	1-315-21831-3 1-62870-487-X 1-282-90267-9 9786612902673 1-4398-0739-6
Descrizione fisica	1 online resource (310 p.)
Disciplina	621.382/4
Soggetti	Microstrip antennas Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Basic concepts of antennas -- Arrays and array synthesis -- Microstrip patch antennas -- Spectral domain approach and its application to microstrip antennas -- Effective methods in using commercial software for antenna design -- Design of conventional and DBF microstrip antenna arrays -- High frequency methods and their applications to antennas -- Planar near-field measurement and array diagnostics.
Sommario/riassunto	Antenna Theory and Microstrip Antennas offers a uniquely balanced analysis of antenna fundamentals and microstrip antennas. Concise and readable, it provides theoretical background, application materials, and details of recent progress. Exploring several effective design approaches, this book covers a wide scope, making it an ideal hands-on resource for professionals seeking a refresher in the fundamentals. It also provides the basic grounding in antenna essentials that is required for those new to the field. The book's primary focus is on introducing practical technique
