Blanco -- Tropics of savagery : the culture of Japanese empire in comparative frame / by Robert Thomas Tierney -- Colonial project, national game : a history of baseball in Taiwan / by Andrew Morris.
Sommario/riassunto	Tropics of Savagery is an incisive and provocative study of the figures

and tropes of "savagery" in Japanese colonial culture. Through a rigorous analysis of literary works, ethnographic studies, and a variety of other discourses, Robert Thomas Tierney demonstrates how imperial Japan constructed its own identity in relation both to the West and to the people it colonized. By examining the representations of Taiwanese aborigines and indigenous Micronesians in the works of prominent writers, he shows that the trope of the savage underwent several metamorphoses over the course of Japan's colonial period--violent headhunter to be subjugated, ethnographic other to be studied, happy primitive to be exoticized, and hybrid colonial subject to be assimilated.

#### Sommario/riassunto

This edited volume is a compilation of the 'built environment' in response to many investigations, analyses and sometimes mere observations of the various dialogues and interactions of the built, in context to its ecology, perception and design. The chapters concentrate on various independent issues, integrated as a holistic approach, both in terms of theoretical perspectives and practical approaches, predominantly focusing on the Global South. The book builds fabric knitting into the generic understanding of environment, perception and design encompassing 'different' attitudes and inspirations. This book is an important reference to topics concerning urbanism, urban developments and physical growth, and highlights new methodologies and practices. The book presumes an understanding unearthed from various dimensions and again woven back to a common theme, which emerges as the reader reads through. Various international experts of the respective fields working on the Global South contributed their latest research and insights to the different parts of the book. This trans-disciplinary volume appeals to scientists, students and professionals in the fields of architecture, geography, planning, environmental sciences and many more.
