Sommario/riassunto	A compilation of all known species of fossil decapod crustaceans arrayed in a modern classification based upon the work of numerous students of extant and fossil decapods represents the first such attempt in nearly 100 years. The systematic list cites authors and carefully verified dates of authorship as well as a complete list of references to all taxa cited. The work is intended to provide insight into the range and relative numbers of fossil taxa within the suborder Decapoda. The compilation will permit interpretation of the nature of completeness of the fossil record and will provide a platform for future research on this important, diverse group of organisms.
