

1. Record Nr.	UNINA9910459646803321
Titolo	Metabolic risk for cardiovascular disease [[electronic resource] /] / edited by Robert H. Eckel
Pubbl/distr/stampa	Dallas, TX, : American Heart Association Chichester, West Sussex, UK, : Wiley-Blackwell, 2010
ISBN	1-4443-4778-0 1-282-77715-7 9786612777158 1-4443-2479-9
Descrizione fisica	1 online resource (261 p.)
Collana	AHA clinical series
Altri autori (Persone)	EckelRobert H
Disciplina	616.1/071
Soggetti	Cardiovascular system - Diseases - Risk factors Metabolic syndrome Obesity - Complications Lipids - Metabolism - Disorders - Complications Diabetes - Complications Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Metabolic Riskfor CardiovascularDisease; Contents; Contributors; Foreword; 1 Insulin action and beta-cell function: role in metabolic regulation; 2 Lipid and lipoprotein metabolism, and risk for cardiovascular disease; 3 Tobacco and risk for cardiovascular disease; 4 Nutrition and risk for cardiovascular disease; 5 Physical activity and cardiovascular health; 6 The obesity epidemic and cardiovascular risk; 7 Insulin resistance, the metabolic syndrome, and cardiovascular risk; 8 Diabetes mellitus and cardiovascular risk; 9 Lipid management and cardiovascular risk reduction 10 Obesity management and cardiovascular risk reduction11 Diabetes management and cardiovascular risk reduction; 12 A healthy lifestyle and cardiovascular risk reduction; Index; Author Disclosure Table
Sommario/riassunto	The relationship of metabolic diseases to cardiovascular disease (CVD)

is reaching epidemic proportions. This relates mostly to the increasing prevalence of obesity, the metabolic syndrome and type 2 diabetes. This book outlines and addresses the metabolic factors and related diseases that contribute to CVD, including brief introductions to metabolic pathways including lipid and lipoprotein metabolism, macronutrient fuel partitioning, insulin action and body weight regulation. Mechanisms that relate to becoming obese, maintenance of the obese state, the dyslipidemias, and glucose intolerance

2. Record Nr.	UNINA9910765740703321
Autore	Lazzeretti Luciana
Titolo	Nascita ed evoluzione del distretto orafo di Arezzo, 1947-2001 : : Primo studio in una prospettiva ecology based // Luciana Lazzeretti
Pubbl/distr/stampa	[s.l.] : , : Firenze University Press, , 2003
ISBN	9788855189927 8855189921
Descrizione fisica	1 online resource (1 p.)
Collana	Studi e saggi
Soggetti	Business & Economics / Industries / Fashion & Textile Industry Economics
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book, generated by the creation of a database on the population of enterprises and their characteristics, illustrates the process of development of the Arezzo gold and jewellery system. It is a significant case in view of its international prestige and the use of highly specialised manpower, and at the same time interesting in terms of type, since it represents an emerging district produced by gemmation from a large enterprise. The analysis offers insight into the process of district development and a methodological support for ulterior investigations. At the same time, it also represents a tool for an understanding of the long-term economic dynamics characterising one

of the most vital productive areas of Tuscany.
