1. Record Nr. UNINA9910459725603321

Autore	Omar Abbas
Titolo	Electromagnetic scattering and material characterization / / Abbas Omar
Pubbl/distr/stampa	Boston, Massachusetts ; , : Artech House, , 2010 [Piscataqay, New Jersey] : , : IEEE Xplore, , [2010]
ISBN	1-59693-217-1
Descrizione fisica	1 online resource (313 p.)
Disciplina	530.141
Soggetti	Electromagnetic waves - Scattering Materials - Testing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: ch. 1 Introduction -- 1.1. Microscopic-Macroscopic Transformation -- 1.2. Metamaterials -- 1.3. Free-Space Measurements and Focusing -- 1.4.
Sommario/riassunto	Based on the author's more than 30 years of experience, this first-of-its-kind volume presents a comprehensive and systematic analysis of electromagnetic fields and their scattering by material objects. The book considers all three categories of scattering environments commonly used for material measurements - unbounded regions, waveguides, and cavity resonators. The book covers such essential topics as electromagnetic field propagation, radiation, and scattering, containing mathematically rigorous approaches for the computation of electromagnetic fields and the explanation of their behavior. Moreover, the book explores new measurement techniques for material characterization ? most of which have never been published before. This detailed reference is packed with over 400 equations.
