Sommario/riassunto

Iowa's rock record is the product of more than three billion years of geological processes. The state endured multiple episodes of continental glaciation during the Pleistocene Ice Age, and the last glacier retreated from Iowa a mere (geologically speaking) twelve thousand years ago. Prior to that, dozens of seas came and went, leaving behind limestone beds with rich fossil records. Lush coal swamps, salty lagoons, briny basins, enormous alluvial plains, ancient rifts, and rugged Precambrian mountain belts all left their mark. In Iowa's Geological Past, Wayne Anderson gi

Sommario/riassunto	Die vielbeschworene "Krise der Representation" geht einher mit populistischen Tendenzen, die das Versagen des Repräsentationsmodells anprangern und sich zugleich zunutze machen wollen. Individuelle Selbst- und repräsentative Mitbestimmung, die gemeinsam die Freiheitsorganisation des modernen Verfassungsstaats konstituieren, scheinen in einen selbstzerstörerischen Gegensatz zu treten. Der Grund ist aber weniger in der Betonung des Rechtsschutzes der individuellen Selbstbestimmung als in einer verbreiteten Fehlvorstellung vom Wesen der Representation zu sehen. Representation verlangt als "Gesamtrepresentation" nach wie vor, dass die politische Entscheidung der Repräsentanten des Volkes sich am allgemeinen Interesse des Gesamtwohls orientiert.
