

1. Record Nr.	UNINA9910459781303321
Titolo	Multi-functional nanoscale materials and their potential applications // edited by Alagarsamy Pandikumar, Huang Nay Ming and Lim Hong Ngee
Pubbl/distr/stampa	Pfaffikon, Switzerland : , : Trans Tech Publications Ltd, , 2015 ©2015
ISBN	3-03826-722-8
Descrizione fisica	1 online resource (177 p.)
Collana	Materials Science Forum, , 1662-9752 ; ; Volume 807
Disciplina	620.5
Soggetti	Nanostructured materials Nanotechnology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Multi-Functional Nanoscale Materials and their Potential Applications; Preface; Table of Contents; Magnetic Nanoparticles as Drug Carriers: Review; Carbon-Based Nanomaterials for Drugs Sensing: A Review; A Review on PEO Based Solid Polymer Electrolytes (SPEs) Complexed with LiX (X=Tf, BOB) for Rechargeable Lithium Ion Batteries; Photodegradation of Reactive Red 141 and Reactive Yellow 105 Dyes Using Prepared TiO ₂ Nanoparticles; V ₂ O ₅ -Photocatalyzed Oxidation of Diphenylamine Enhancement of CdO/ZnO/PVC Nanocomposites Behavior on Photo- Catalytic Degradation of Congo-Red Dye under UV Light IrradiationA Comparative Study on the Role of Precursors of Graphitic Carbon Nitrides for the Photocatalytic Degradation of Direct Red 81; Synthesis of Zn Doped CdSe Quantum Dots via Inverse Micelle Technique; Preparation and Characterization of Pure and Lanthanum Doped ZnO Nanoparticles by Solution Route; Dielectric Relaxation Study on TiO ₂ Based Nanocomposite Blend Polymer Electrolytes; Optical Sensing of TiO ₂ Nanofluid for Self Stability Facile Preparation of Nanocrystalline ZnO Powder for Non-Volatile Memory ApplicationClay Intercalated PVA-Nafion Bipolymer Matrix as Proton Conducting Nanocomposite Membrane for PEM Fuel Cells; Solvatochromism and Electroabsorption Studies of Drug Carriers;

Sommario/riassunto

Nanotechnology is now ubiquitous and deeply embedded in our day-to-day lives. Unknowingly, it has weaved seamlessly into various applications, making it impossible to look passed its importance. This volume is a compendium of review as well as research articles, providing a wide spectrum of bottom-up fabrication approaches and their utilization on multiple fronts. This volume will be valuable to scientists, academicians, engineers and students who are keen to discover the advances in nanotechnology for favorable materials construction techniques and applications in relation to human health, en
