Sommario/riassunto	Floods are devastating natural disasters with a significant impact on human life and the surrounding environment. Flood Risk Assessment and Management should serve as an Ideal textbook on analytical flood risk assessment and management, and is intended for lecturers, undergraduates and postgraduates in civil engineering, geography, environmental science, earth sciences, and related disciplines. This book is based on the lecture notes taught at the University of Bristol to students undertaking a Masters course in civil engineering. All chapters are supplemented with challenging questions, answer
