Sommario/riassunto	First published in 1971, this reissue considers the main aspects of foreign aid to developing countries in terms of economic concepts and principles. The author gives an economic definition of aid and considers the motives for giving aid and the principles on which it may be allocated. He looks at the effect on the economic growth of developing countries of both the aid given and the need to repay the debt, and the effect on trade patterns and resource allocation of tying aid to one particular project, or one source of goods. While economic analysis is only a first step in providing a basis
