| Nota di bibliografia | Includes bibliographical references and index. |
| Sommario/riassunto | Dating back millennia, antisemitism has been called ""the longest hatred."" Thought to be vanquished after the horrors of the Holocaust, in recent decades it has once again become a disturbing presence in many parts of the world. Resurgent Antisemitism presents original research that elucidates the social, intellectual, and ideological roots of the ""new"" antisemitism and the place it has come to occupy in the public sphere. By exploring the sources, goals, and consequences of today's antisemitism and its relationship to the past, the book contributes to an understanding of this phenomenon |

Sommario/riassunto

Written by a team of internationally recognized experts from the medical and allied health communities, this text addresses core issues related to patient management, recovery, and outcomes following surgical and nonsurgical treatment for head and neck cancer. It also provides theoretical and clinical knowledge for speech therapists managing head and neck cancer patients and describes key concepts of patient care at a level suitable for both undergraduate and graduate students.
