Sommario/riassunto

This comprehensive textbook analyzes the ethical issues of health and health care in global perspective. Ideal for students of public health, medicine, nursing and allied health professions, public policy, and ethics, the book helps students in all these areas to develop important competencies in their chosen fields. Applying a comparative, or multicultural, approach, the book compares different perspectives on ethical issues in various countries and cultures, such as informed consent, withholding or withdrawing treatment, physician-assisted suicide, reproductive health issues, research with h
