Sommario/riassunto

This book brings together international experience of business planning for digital libraries: the business case, the planning processes involved, the costs and benefits, practice and standards, and comparison with the traditional library where appropriate. Although there is a vast literature already on other aspects of digital libraries, business planning is a subject that until now has not been systematically integrated in a book. Digital libraries are being created not only by traditional libraries, but by museums, archives, media organizations, and indeed any organization concerned with ma
