Sommario/riassunto	When children are late in hitting developmental milestones, parents worry. And no delay causes more parental anxiety than late talking, which is associated in many parents' minds with such serious conditions as autism and severe intellectual disability. In fact, as children's speech expert Stephen Camarata points out in this enlightening book, children are late in beginning to talk for a wide variety of reasons. For some children, late talking may be a symptom of other, more serious, problems; for many others, however, it may simply be a stage with no long-term complications. Camarata describes in accessible language what science knows about the characteristics and causes of late talking. He explains that today's greater awareness of autism, as well as the expanded definition of autism as a "spectrum" of symptoms, has increased the chances that a late-talking child will be diagnosed -- or misdiagnosed -- with autism. But, he reminds us, late talking is only one of a constellation of autism symptoms. Although all autistic children are late talkers, not all late-talking children are autistic.

Sommario/riassunto	Material culture has emerged in recent decades as a significant theoretical concern for the study of religion. This book contributes to and evaluates this material turn, presenting thirteen chapters of new empirical research and theoretical reflection from some of the leading international scholars of material religion. Following a model for material analysis proposed in the first chapter by David Morgan, the contributors trace the life cycle of religious materiality through three phases: the production of religious objects, their classification as religious (or non-religious), and their circulation and use in material culture. The chapters in this volume consider how objects become and cease to be sacred, how materiality can be used to contest access to public space and resources, and how religion is embodied and performed by individuals in their everyday lives. Contributors discuss the significance of the materiality of religion across different religious traditions and diverse geographical regions, paying close attention to

gender, age, ethnicity, memory and politics. The volume closes with an afterword by Manuel Vasquez.
