Manipulation of temporal deixis7. Other tenses in headlines; 7.1 Expressing futurity; To-future; Modal auxiliaries; Will-future; Lexically expressed future; 7.2 The present perfect; Headlines marking trends and changes; Heteroglossic headlines; Dual headlines; 7.3 The simple past tense: From heteroglossia to information flow management; The past tense in the non-authorial accessed voice; The past tense in the paper's authorial voice; The past tense as a marker of non-recency; The past tense, subordination and information flow; The past tense as a marker of accessed voice

Other uses of the simple past tense - the non-factive presupposition

| Sommario/riassunto | This book provides the first comprehensive account of temporal deixis in English printed and online news texts. Linking the characteristic usage of tenses with the projection of deictic centres, it notes how conventional tenses, particularly in headlines, are affected by heteroglossia arising from various accessed voices. The resulting tense shifts are interpreted pragmatically as a conventional reader-oriented strategy that creates the impression of temporal co-presence. It is argued that since different tense choices systematically correlate with the three main textual segments of news texts |

Sommario/riassunto	The paper argues that both nouns and adjectives are interpreted as relational in the construct state. Accordingly, relational nouns can all be inflected in the construct state, and so can some sortal nouns which can be coerced to a relational interpretation. Similarly, relational adjectives can all be inflected in the construct state, and so can some predicative adjectives which can be reinterpreted as relational when in construct with a relational annex. The present approach accounts for the non-modifiability of such relational annex, and the restriction of its denotation to intra-individual
