	Sommario/riassunto	The year 2000 initiated a decade of spectacular growth in the information and communication technology sector in developing countries. Almost 75 percent of the world's mobile telephone subscriptions are in low- and middle-income countries, which have also promoted exciting innovations and realized significant economic development benefits. However, the adoption and use of broadband technology is another matter. Countries in North America and the European Union account for more than 50 percent of the world's 1 billion fixed and mobile broadband subscriptions, but South Asia and Sub-Saharan Afri
