Sommario/riassunto	This richly illustrated book is the eighth of nine Classics in Southeastern Archaeology volumes based on Moore's investigations along the waterways of eastern North America. This oversized reprint volume presents original materials from Moore's northernmost expeditions conducted in the early 1900's as he surveyed areas of potential archaeological interest in the southeastern United States. Some of the sites he found were later targeted for major excavations

during the days of the WPA/CCC. Many National Register Historic Sites
are today located along the rivers he e
