	Sommario/riassunto	Through a series of research reports, this book discusses the operational status of Chinese enterprises with foreign investment. Since China's period of economic reform and openness, the country has experienced more than 30 years of development, with hundreds of thousands of foreign-invested enterprises being established in various parts of the country. Their operational statuses are of interest not only

to governments and research institutes, but also to foreign investors and enterprises. Drawing from a massive collection of published literature and statistics, the book - which is printed as
