Sommario/riassunto	The number of children diagnosed with autism has increased dramatically in the last decade, and a growing number of behavior analysts, psychologists, educators, and speech pathologists-to name a few-are just starting to regularly treat individuals with autism. Children and adults with autism spectrum disorder (ASD) require specialized instruction and behavior support to teach them critical skills and establish a meaningful quality of life. However, these objectives can only be achieved if professional and paraprofessional service providers have access to the most effective evidence-based and e
