Nota di contenuto	Cognitive development among young children in low-income countries -- The influence of economic crisis on early childhood development, a review of pathways and measured impact -- Conflicts, epidemics and orphanhood : the impact of extreme events on the health and educational achievements of children -- Promoting equity through early child development interventions for children 0-3 years.
Sommario/riassunto	Education is often seen as a fundamental means to improve economic prospects for individuals from low income settings. However, even with increased emphasis on basic education for all, many individuals fail to achieve basic skills to succeed in life. The book presents evidence that one core reason is that by the time a child is old enough to attend school, there is already a wide disparity in cognitive skills and in emotional and behavioral development among children from households of different socioeconomic backgrounds. Low levels of cognitive development in early childhood strongly correlat

2. Record Nr.	UNISA996390875703316
Autore	Harvey Gideon <1640?-1700?>
Titolo	A theoretical and chiefly practical treatise of fevors [[electronic resource]] : wherein it's made evident that the modern practice of curing continual fevors is dangerous and very unsuccessful : hereunto are added several important observations and cures of malignant fevors not inserted in the former impression // written in Latin by Gideon Harvey ... ; now rendered into English by J.T. and surveyed by the author
