Sommario/riassunto	This is an informal history of modern economic thought as told through autobiographical chapters by twenty-three Nobel Prize laureates in Economics. The chapters not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. This edition adds four recent Nobelists to its pages: Eric Maskin, Joseph Stiglitz, Paul Krugman, and Peter Diamond.

Sommario/riassunto	Drawing on the most prominent research in the field, this timely book offers bold new fiscal policies that can complement current automatic stabilizers and counter-cyclical monetary policy to help combat recessions. Dr. Seidman argues for an independent fiscal policy board or the Federal Reserve to decide changes in the magnitude of Congress's fiscal policy package of stimulus or restraint, with recommendations going into effect immediately, subject only to Congressional override.
