Sommario/riassunto	This volume documents and explains the remarkable resilience of emerging market nations in East Asia and Latin America when faced with the global financial crisis in 2008-2009. Their quick bounce back from the crisis marked a radical departure from the past, such as when the 1982 debt shocks produced a decade-long recession in Latin

America or when the Asian financial crisis dramatically slowed those economies in the late 1990's. Why? This volume suggests that these countries' resistance to the initial financial contagion is a tribute to financial-sector reforms undertaken over the past two decades
