Titolo	The river runs black [[electronic resource] ] : the environmental challenge to China's future / / Elizabeth C. Economy
Pubbl/distr/stampa	Ithaca, : Cornell University Press, 2010
ISBN	0-8014-5820-X 0-8014-5944-3
Edizione	[2nd ed.]
Descrizione fisica	xi, 364 p. : map
Collana	A Council on Foreign Relations Book
Disciplina	333.70951
Soggetti	Environmental policy - China Economic development - Environmental aspects Electronic books. China Economic conditions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A Council on Foreign Relations book."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The death of the Huai River -- A legacy of exploitation -- The economic explosion and its environmental cost -- The challenge of greening China -- The new politics of the environment -- The devil at the doorstep -- Lessons from abroad -- Averting the crisis.
Sommario/riassunto	China's spectacular economic growth over the past two decades has dramatically depleted the country's natural resources and produced skyrocketing rates of pollution. Environmental degradation in China has also contributed to significant public health problems, mass migration, economic loss, and social unrest. In <i>The River Runs Black</i> , Elizabeth C. Economy examines China's growing environmental crisis and its implications for the country's future development. Drawing on historical research, case studies, and interviews with officials, scholars, and activists in China, Economy traces the economic and political roots of China's environmental challenge and the evolution of the leadership's response. She argues that China's current approach to environmental protection mirrors the one embraced for economic development: devolving authority to local officials, opening the door to private actors, and inviting participation from the international community, while retaining only weak central control. The result has been a patchwork of

environmental protection in which a few wealthy regions with strong leaders and international ties improve their local environments, while most of the country continues to deteriorate, sometimes suffering irrevocable damage. Economy compares China's response with the experience of other societies and sketches out several possible futures for the country. This second edition of *The River Runs Black* is updated with information about events between 2005 and 2009, covering China's tumultuous transformation of its economy and its landscape as it deals with the political implications of this behavior as viewed by an international community ever more concerned about climate change and dwindling energy resources.
