

1.	Record Nr.	UNIPARTHENOPE000015881
	Autore	Aceto di Capriglia, Salvatore
	Titolo	Nuove frontiere della successione necessaria / Salvatore Aceto di Capriglia
	Pubbl/distr/stampa	Torino : Giappichelli, 2008
	ISBN	978-88-348-8605-2
	Collana	Comparazione e diritto civile / diretta da Gabriella Autorino e Pasquale Stanzone ; 3
	Disciplina	346.45052
	Collocazione	D-0148
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910460294903321
	Titolo	The nature of scientific evidence [[electronic resource]] : statistical, philosophical and empirical considerations / / edited by Mark L. Taper and Subhash R. Lele
	Pubbl/distr/stampa	Chicago, : University of Chicago Press, 2004
	ISBN	1-283-05860-X 9786613058607 0-226-78958-6
	Descrizione fisica	1 online resource (586 p.)
	Altri autori (Persone)	TaperMark L. <1952-> LeleSubhash
	Disciplina	507/.2
	Soggetti	Science - Statistical methods Science - Methodology Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Scientific process -- pt. 2. Logics of evidence -- pt. 3. Realities of nature -- pt. 4. Science, opinion and evidence -- pt. 5. Models, realities and evidence -- pt. 6. Conclusion.
Sommario/riassunto	An exploration of the statistical foundations of scientific inference, The Nature of Scientific Evidence asks what constitutes scientific evidence and whether scientific evidence can be quantified statistically. Mark Taper, Subhash Lele, and an esteemed group of contributors explore the relationships among hypotheses, models, data, and inference on which scientific progress rests in an attempt to develop a new quantitative framework for evidence. Informed by interdisciplinary discussions among scientists, philosophers, and statisticians, they propose a new "evidential" approach, which may be more in keeping with the scientific method. The Nature of Scientific Evidence persuasively argues that all scientists should care more about the fine points of statistical philosophy because therein lies the connection between theory and data. Though the book uses ecology as an exemplary science, the interdisciplinary evaluation of the use of statistics in empirical research will be of interest to any reader engaged in the quantification and evaluation of data.
