Sommario/riassunto	This eBook contains papers on the subject of the impact of social and mobile media and networks on learning environments in higher education. Authors discuss varied topics including ICT in higher

education and how students perceive increased engagement, how to use web and social media analytics to measure digital professional development, the current ongoing paradigm shift in mobile knowledge, and a fascinating peek into perceptions of technology's impact on academic misconduct. Further papers explore a special interest group approach toward facilitating professional development of mobile and
