Nota di contenuto	Contents; Chapter 1: Introduction; Chapter 2: Choosing an appropriate survey structure; Chapter 3: Sampling for a typical population-based survey; Chapter 4: Child labour survey (CLS): Linked sample of reduced size; Chapter 5: Labouring children survey; Chapter 6: An illustration of sample design and selection procedures; Chapter 7: Estimation from sample data
Sommario/riassunto	This manual presents a wide range of sampling techniques for household-based child labour surveys with a particular emphasis on sampling design and selection procedures. It is meant to assist survey professionals in statistical offices, universities and research organizations. Many of the concepts and approaches introduced by the Manual are illustrated with examples from SIMPOC child labour surveys conducted in all major world regions.
