

1. Record Nr.	UNINA9910460431803321
Autore	Seco J. M (Jose Manuel)
Titolo	The assignment of the absolute configuration by NMR using chiral derivatizing agents : a practical guide // J.M. Seco, Emilio Quinoa, and R. Riguera
Pubbl/distr/stampa	New York, New York : , : Oxford University Press, , 2015 ©2015
ISBN	0-19-756337-6
Descrizione fisica	1 online resource (265 p.)
Collana	Oxford scholarship online
Disciplina	543/.66
Soggetti	Nuclear magnetic resonance spectroscopy Spectrum analysis Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2015.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>""Cover""; ""The Assignment of the Absolute Configuration by NMR Using Chiral Derivatizing Agents""; ""Copyright""; ""Contents""; ""Preface""; ""Introduction""; ""1 The Theoretical Basis for Assignment by NMR""; ""1.1. Distinguishing Enantiomers by NMR: The Use of CDAs""; ""1.2. Structural Characteristics of the Auxiliaries and the Substrates""; ""1.3. Importance of the Conformation""; ""1.4. Importance of the Aromatic Shielding Effect""; ""1.5. Use of 13C NMR for Assignment""; ""1.6. Simplified Approaches to Assignment by NMR""</p> <p>""2.1. Instrumentation, Concentration, Solvent, and Temperature of the NMR Experiment""""2.2. Source and Preparation of the CDAs""; ""2.3. Preparation of the CDA Esters, Thioesters, and Amides""; ""2.3.1. Derivatization of Alcohols, Thiols, and Cyanohydrins Using the CDA Acid""; ""2.3.2. Derivatization of Amines Using the CDA Acid""; ""2.3.3. Preparation of the CDA Acid Chlorides""; ""2.3.4. Derivatization of Alcohols, Thiols, and Cyanohydrins Using the CDA Acid Chloride""; ""2.4. Resin-Bound CDA Derivatives (Mix-and-Shake Method)""; ""2.4.1. Preparation of Resin-Bound CDA Derivatives""</p> <p>""2.4.2. Preparation of Acid Chloride Resins""""2.4.3. Preparation of CDA-Resins""; ""2.4.4. Determination of the Loading of the CDA-Resins""; ""2.4.5. In-Tube Derivatization of Amines""; ""2.4.6. In-Tube</p>

Derivatization of Primary and Secondary Alcohols, Cyanohydrins, and Secondary Thiols"; "2.4.7. In-Tube Derivatization of Amino Alcohols"; "2.4.8. In-Tube Derivatization of Diols and Triols"; "2.4.9. In-Tube Derivatization for Single-Derivatization Procedures"; "3 Assignment of the Absolute Configuration of Monofunctional Compounds by Double Derivatization"

Sommario/riassunto

This guide offers a concise explanation of the theoretical aspects necessary for understanding the methodology underpinning cutting-edge research in the field of nuclear magnetic resonance (NMR) spectroscopy.
