Sommario/riassunto	Assessing, Diagnosing, and Treating Serious Mental Disorders uniquely provides information that is useful across mental health, psychopathology, practice, and human behavior and development classes, particularly for psychopathology and advanced mental health practice courses. DSM-IV-TR diagnostic criteria is provided for each mental disorder discussed in the textbook. This book represents a new

wave of social work education, focusing on mental disorders as an interaction among neurobiology, genetics, and ecological social systems. Edward Taylor argues that most all mental disorders have a four
