ISBN	1-4985-2239-4
Descrizione fisica	1 online resource (249 p.)
Disciplina	123.5
Soggetti	Free will and determinism Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	_GoBack; _GoBack
Sommario/riassunto	Restorative Free Will examines free will as an adaptive capacity that evolved in humans and many other species, and restores free will to species excluded by claims of human uniqueness. Restorative Free Will recognizes the basic biological value of both libertarian and compatibilist elements of free will, and explains how these traditionally opposed accounts of free will capture an essential element of foraging animals' free will.
