Sommario/riassunto

In this age of asymmetric warfare, battles are fought more and more against armed groups of opponents such as terrorists, insurgents, or transnational criminal organizations. Sommario/riassunto	The Companion to the Hanseatic League discusses the importance of the Hanseatic League for the social and economic history of pre-modern northern Europe. Established already as early as the twelfth century, the towns that formed the Hanseatic League created an important network of commerce throughout the Baltic and North Sea area. From Russia in the east, to England and France in the west, the cities of the Hanseatic League created a vast northern maritime trade network. The aim of this volume is to present a "state" of the field English-language volume by some of the most respected Hanse scholars. Contributors are Mike Burkhardt, Ulf Christian Ewert, Rolf Hammel-Kiesow, Donald J. Harreld, Carsten Jahnke, Michael North, Jürgen Sarnowsky and Stephan Selzer.
