| Descrizione fisica | 1 online resource (466 p.) |
| Disciplina | 617.5230592 |
| Soggetti | Rhinoplasty Nose - Surgery Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | ""11. POSTOPERATIVECONSIDERATIONS""""12. SPECIAL PROBLEMS"""; ""13. CASES""; ""14. NASALRECONSTRUCTION""; ""15. References"" |
| Sommario/riassunto | PrefaceIn line with Darwin's theory of evolution from 1859, three ingredients have determined the evolution in rhinoplasty during the last century: variation, reproduction and pressure. On the shoulders of giants, a variety of philosophies and rhinoplasty techniques were consistently developed and modified. These techniques were reproduced by text books and journals as well as during conferences, working visits, and fellowship programs. Pressure, the result of both the drive of the surgeon and the high demands of patients seeking rhinoplasty, has subsequently increased the level of rhinoplasti |
