**Sommario/riassunto**

"For indigenous communities throughout the globe, mining has been a historical forerunner of colonialism, introducing new, and often disruptive, settlement patterns and economic arrangements. Although indigenous communities may benefit from and adapt to the wage labour and training opportunities provided by new mining operations, they are also often left to navigate the complicated process of remediating the long-term ecological changes associated with industrial mining. In this regard, the mining often inscribes colonialism as a broad set of physical and ecological changes to indigenous lands. This collection examines historical and contemporary social, economic, and environmental impacts of mining on Aboriginal communities in northern Canada. Combining oral history research with intensive archival study, this work juxtaposes the perspectives of government and industry with those of local communities. The oral history and ethnographic material provides an extremely significant record of local Aboriginal perspectives on histories of mining and development in their regions."--

Sommario/riassunto	Becoming Bourgeois traces the fortunes of three French families in the municipality of Vannes, in Brittany-Galles, Jollivet, and Le Ridant-who rose to prominence in publishing, law, the military, public administration, and intellectual pursuits over the course of the eighteenth and nineteenth centuries. Revisiting complex issues of bourgeois class formation from the perspective of the interior lives of families, Christopher H. Johnson argues that the most durable and socially advantageous links forging bourgeois ascent were those of kinship. Economic success, though certainly derived from the virtues of

hard work and intelligent management, was always underpinned by marriage strategies and the diligent intervention of influential family members. Johnson's examination of hundreds of personal letters opens up a whole world: the vicissitudes of courtship; the centrality of marriage; the depths of conjugal love; the routines of pregnancy and the drama of childbirth; the practices of child rearing and education; the powerful place of siblings; the role of kin in advancing the next generation; tragedy and deaths; the enormous contributions of women in all aspects of becoming bourgeois; and the pleasures of gathering together in intimate soirées, grand balls, country houses, and civic and political organizations. Family love bound it all together, and this is ultimately what this book is about, as four generations of rather ordinary provincial people capture our hearts.
