Sommario/riassunto

Meet the next global currency: the Chinese renminbi, or the ""redback."" Following the global financial crisis of 2008, China's major monetary policy objective is the internationalization of the renminbi, that is, to create an inter-national role for its currency akin to the international role currently played by the U.S. dollar.Renminbi internationalization is a hot topic, for good reason. It is, essentially, a window onto the Chinese government's aspirations and the larger process of economic and financial transformation. Making the renminbi a global currency requires rebalancing the Chinese
